

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MI Charles Stanley Multi Asset Moderate Fund ("the Fund") A Income Shares

This is a sub fund of MI Charles Stanley Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00BD89MG92. Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The Fund aims to achieve a combination of capital growth and income over the medium to long term (that is, over five years or more).

The Fund will aim to deliver gross investment returns of inflation (as measured by the Consumer Prices Index) plus 2%, over a 5-year period. However, there is no guarantee that this return will be achieved and investors should note that capital is at risk.

The Fund has a flexible investment approach with a moderately defensive risk profile and will gain exposure to a globally diversified range of investments. The Fund will be up to 75% invested in company shares through either direct or indirect investment. Other investments can include: bonds (which are like loans that pay a fixed or variable rate of interest) issued by companies or governments; cash, currencies, other investment funds and indirect investment in commodities (such as agricultural products, precious metals and oil) and real estate.

The Investment Manager has discretion on which investments to hold in the Fund without any geographic restrictions.

The Fund can use derivatives, which are financial instruments whose value is linked to the rise and fall of other assets, for both efficient portfolio management and investment purposes.

Any income this share class generates will be paid out to your bank account.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- The Fund may invest in cash and cash equivalent securities to try to protect its value in times of market uncertainty but this may not always be successful.
- Changes in exchange rates may cause the value of investments to decrease or increase.
- Investing in other funds may expose you to increased risk due to restrictions on withdrawals, less strict regulations and use of derivatives.
- Investing in bonds offers you income generation and sometimes a gain on your capital. Nevertheless, there is a risk that the organisation which issued the security will fail, which would result in a loss of income to the fund, along with its initial investment. Fixed income values are likely to fall if interest rates rise.
- There may be cases where the organisation from which we buy an asset (usually a financial institution such as a bank) fails to carry out its obligations, which could cause losses to the Fund.
- Investment grade bonds, as determined by international ratings agencies, potentially produce a lower level of income than non-investment grade securities, but they are also considered to be of lower risk.
- This Fund can use derivatives in order to meet its investment objectives. This may result in gains or losses that are greater than the original amount invested.
- Emerging markets are prone to more political, economic and structural challenges and disclosure standards can be less stringent than those of developed economies. This means your money could be at greater risk.
- The Fund title is not related to the risk rating that appears on the 1-7 scale above, which is based solely on past data.
- For further risk information please see the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry charge | 0.00% |
| Exit charge | 0.00% |

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

| | |
|-----------------|-------|
| Ongoing charges | 1.13% |
|-----------------|-------|

Charges taken from the Fund under specific conditions

| | |
|-----------------|------|
| Performance fee | NONE |
|-----------------|------|

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 31 March 2019.
- The ongoing charge also includes the expenses incurred by the investment schemes held by the Fund.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- For more information about charges, please see the prospectus.
